About MS Schippers Philippines

Schippers Philippines, Inc. is a joint venture between MS Schippers of the Netherlands and the INFARMCO Group of Companies in the Philippines. Initially focused on swine AI, the company now offers livestock hygiene and biosecurity solutions, including the HyCare program to improve hygiene and reduce antimicrobial resistance (AMR).

Through HyCare, Schippers Philippines, Inc. aims to improve animal health and productivity by implementing superior hygiene standards.

What is HyCare?

The HyCare program is a specialized farm biosecurity initiative designed to help livestock farms.

Healthier Animals

Fewer Antibiotics

Improved Performance

Lower mortality rate

Higher ROI

Increase Animal Welfare

BIOSECURITY = Hygiene Animal Care

Pillars of HyCare

HyCare is a program consisting of five pillars.

HyCare

CLEANING AND DISINFECTION

Our cleaning and disinfection products limit the introduction and spread of pathogen and protect high-risk areas on the farm. Proper barn sanitation is essential for a disease-free environment.

CLEAN DRINKING WATER

Clean drinking water is the most vital nutrient for animals, yet often overlooked. Our clean drinking water programs ensure water quality is maintained from the source to the animals' consumption.

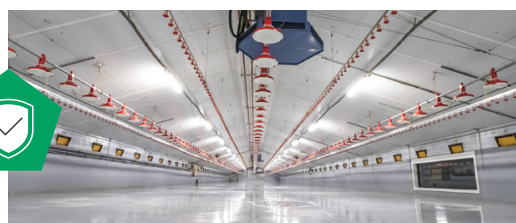

HEALTHY CUT

Animal care is essential for ensuring longevity and productivity. Improved care and supply boost immunity, prevent infections, and maximize growth and performance.

DRY LIVING ENVIRONMENT

A dry and clean environment supports animal health. Hygiene powders help pigs stay warm, reduce bacteria, and improve comfort, lowering infection risks for piglets.

PEST CONTROL

Animal housing offers pests an ideal environment with food, shelter, and comfort. Our pest control solutions effectively prevent disease carriers, keeping rodents and flies away from the herd.

**It has been proven:

Cleaning with
MS TopFoam

Disinfecting with
MS Megades Kiemkill

Let the foam work for you!

MS Topfoam is a highly-effective foaming cleaner with exceptional cleaning power in livestock and poultry farming.

- Superior Adhesion to vertical surfaces
- Deep Cleaning
- Cleans a large surface area
- Foam actively penetrates dirt
- Fresh Scent
- Active Ingredient: Sodium Hydroxide

Dilution: 1Liter : 100 liters.
Rinse after 60 minutes or
before it dries

Packaging : 22 kg

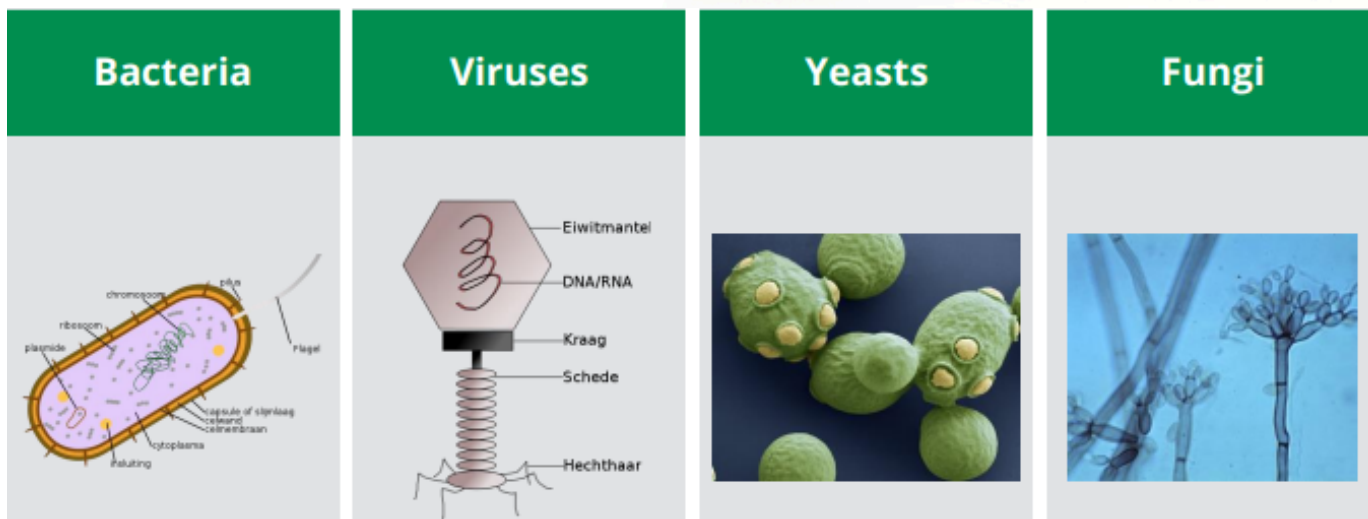

save up to 30% in actual working time, water and product consumption

Proven and Tested by our customers

MS MEGADES KIEMKILL

Effective against:

Your facility perfectly disinfected

MS MegaDes Kiemkill is a powdered disinfectant for animal housing.

Quick acting efficacy at low concentration and excellent penetration

Quick elimination of bacteria, fungi, viruses, and yeast

Color indicates effectivity

Active Ingredients:

- Pentapotassium bis (peroxymonosulphate) bis(sulphate)
- Sodium dichloroisocyanurate

Dilution:

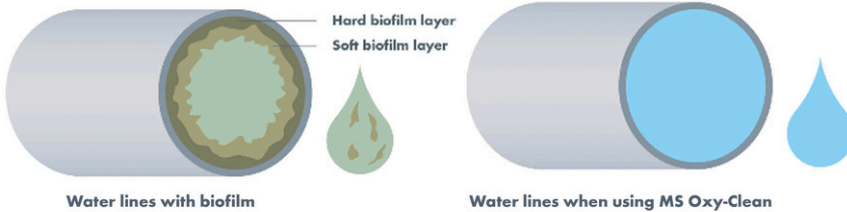

Disinfection: 1:200 | Footbath and Tire Bath: 1:50

**AGAINST
ASF**

MS OXY-CLEAN

Biofilm is harmful, causing infections, food safety issues, and economic losses.

Is your water clean enough to drink ?

MS Oxy-Clean is a cleaning agent for farm water systems that effectively removes organic residues and disinfects pipes.

- Removes biofilm
- Disinfects pipes and tanks
- Cleans hard residues
- Improves water quality
- Sanitizing drinking water
- Non-corrosive to pipelines
- No risk of bacterial resistance development
- Taste and smell of the water are not affected
- Active Ingredient: Hydrogen Peroxide Solution

Dosage: Dissolve 1 to 3 liters per 100 liters of water, and apply this solution to the drinking water system of an empty barn.

Packaging : 24 liters

MS DI-O-CLEAN

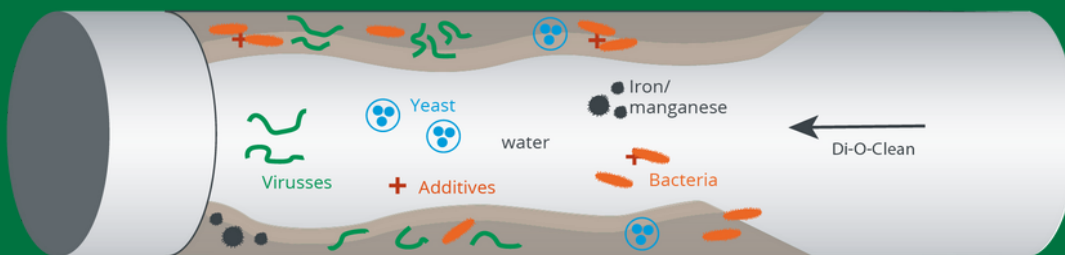

Week 0

Week 4

Week 7

MS Di-O-Clean eliminates biofilm.

MS Di-O-Clean is applicable for cleaning and disinfection of drinking water systems in livestock and poultry farming.

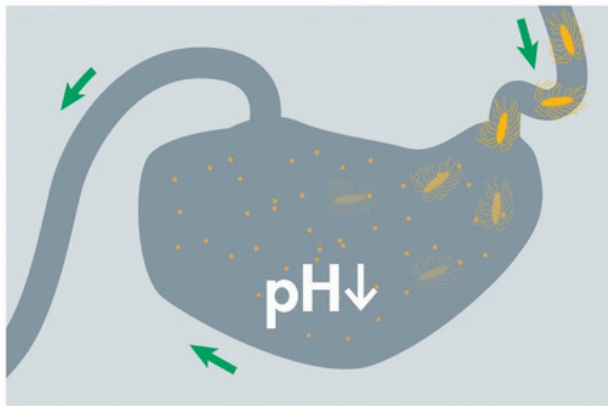

- Effectively kills ASF & Avian Influenza Virus (Bird Flu) in water
- Removes biofilm
- Prevents new biofilm formation
- Effective against pathogen (bacteria and viruses)
- No chemical taste or smell in water
- Not pH dependent
- Does not form toxic by-products such as Trihalomethanes (THMs), mutagens, & Chlorophenols
- Can be used while animals are present in the barn
- Active Ingredient: Chlorine Dioxide

MS DI-O-CLEAN
AGAINST
AVIAN FLU
ASF

260% more effective than a chlorine-based disinfectant

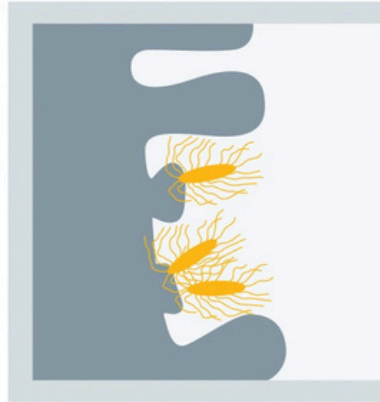

MS GOLDFEED

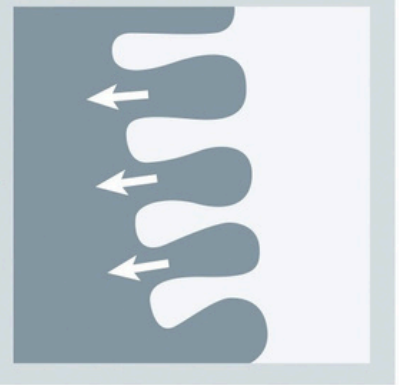

Stomach

Before

After

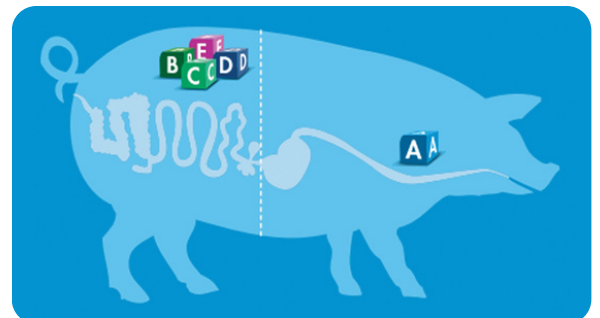

Intestine

Good intestinal health improves overall performance

MS GoldFeed range contains various organic acids that are used to support gastro-intestinal health for pigs and poultry.

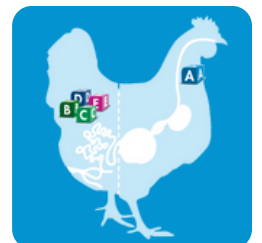

- Optimizes digestion
- Improves gut health
- Has an antimicrobial effect on stomach and intestines
- Improves resistance to diseases
- Easily acidifies high pH water
- Helps prevent biofilm formation

Active Ingredients: Organic acid blends

Dosage:

Use 1 to 2 liters per 1,000 liters of water, depending on the buffering capacity of the water. The pH of the drinking water should be maintained between 3.5 and 4.0.

MS DRYCARE

For optimal housing hygiene

MS DryCare is an instant drying powder for quick moisture absorption, clean living environment, and pleasant smell.

Active Ingredient: Calcium Carbonate

- Very high absorption, >200%
- Creates a dry, bacteria-resistant environment
- Easy to spread
- Nice eucalyptus smell that neutralizes odors
- pH-neutral, non-irritating to animals (teats, skin, hooves)

Pigs	
Piglet/sow section	50 g/m, 3 times per week
Farrowing pens	daily, as required
Nursery Pens	50-100 g/m

Poultry	
Broilers:	100 g/m ² , at the start of the round, and then scatter on wet patches
Laying nests:	50 g/m ² , 1 time every 2 weeks

MS RODETOX

- Cost effective
- Attractive bait for rats and mice
- Painless death with minimal odor

The solution to your pest problems

Rodetox grains

- Active Ingredient: Bromadiolon
- Coated wheat grains ready to use bait for the control of rats and mice
- Dosage: Put 15-50 grams in a closed bait station
- Packaging: 5kg

Rodetox paste

- Active Ingredient: Brodifacoum
- Very powerful anticoagulant based bait
- 1 bite, 1 kill
- Exceptionally good for combating brown and black rats
- Packaging: 2kg

Rodetox blocks

- Active Ingredient: Brodifacoum
- Packaging: 2kg, 5kg

Offer the bait in enclosed bait stations.

MS AZA-FLY

MIX: 500g of AZAFLY in 5 kilos of brow sugar and scatter around housing.

BRUSH: Mix 125ml AZAFLY in 125ml of warm water and apply to housing surface

SPRAY: Dissolve 500 grams AZAFLY in 2.5 liters of warm water and spray on surface

MS AZA-FLY

- Highly effective repellent
- Long-lasting activity (4-6 weeks)
- Powerful contact poison with a very fast reaction time
- Gives your animals a healthy, sanitary environment

Active ingredient: Azamethiphos 10%

MS THIA-FLY

- Adult flies, control flies
- Flying insects, especially control of fruit fly and house fly

Benefits:

- Highest paralysis rate in test against houseflies
- 100% effective repellent
- Fast-acting: flies will drop dead within 2 meters after contact
- Contact poison
- Long lasting (4-6 weeks)

Active ingredient: Thiamethoxam
