Your water system cleaned and disinfected

MS Di-O-Clean is applicable for cleaning and disinfection of drinking water systems in professional livestock farming. Removes and prevents biofilm in water piping systems. Clean drinking water is an important factor for optimal performance in every livestock stable.

- Removes biofilm layers in pipework
- Prevents biofilm formation
- Kills pathogens like bacteria, viruses and reduces disease pressure
- Improves water quality and thus feed intake
- 260% more effective than a chlorine-based disinfectant
- Effectively kills ASF & A.I. Virus (Bird Flu) in water
- No effect on taste & water
- Not pH dependent
- Does not form toxic by products such as Trihalomethanes (THMs), Mutagens & Chlorophenols
- Non-hazardous
